

# StruxureWare™ Operations: Change for Data Centers

Fully integrated workflow management for your IT physical infrastructure

Workflow management allows for easy tracking and executing of moves, adds, and changes of equipment in the data center

## Data Center Management Application for StruxureWare for Data Centers: Operations Suite

**StruxureWare Operations: Change** enables operators to gain control over the data center environment by implementing organized moves, adds, and change work processes, significantly reducing the risk for inadvertent downtime.

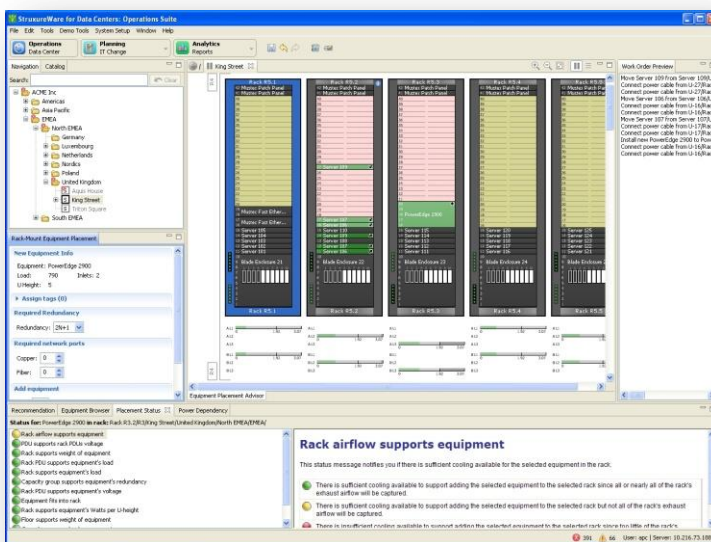

> With its automated workflow system, operators can assign work orders, reserve space, track status, and extract an audit trail for complete visibility and history into the change lifecycle.

> The optional StruxureWare Operations: Mobile provides you with your operational changes while on the data center floor, enabling barcode scanning and ensuring data integrity, as well as improved operational efficiency.

> Gain total transparency of physical equipment changes by user in the data center through StruxureWare Operations: Change.

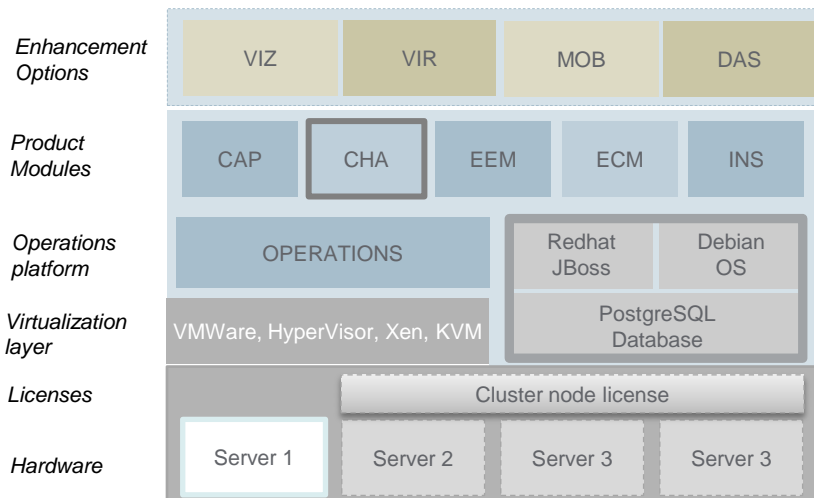

> Track asset moves, adds and changes by date/time, owner and work orders for view, print and export.

> StruxureWare Operations: Change is an integrated part of the StruxureWare for Data Centers: Operations Suite offer by Schneider Electric.

### Building a solution

Overview of Schneider Electric's StruxureWare for Data Centers: Operations Suite Offer

# Features & Benefits

Workflow Management	Benefits
Automated work order process	Create work orders and automatically generate tasks to move, add or change IT equipment. Schedule, assign and track the status of itemized tasks to implement changes in the data center
Schedule of changes	View agenda of pending changes to assist time management and workload balancing
Custom tasks	Specify the activities required to fulfill the needs of the individual work order
Space reservation	Reserve rack space for new equipment to be installed quickly and easily.
Progress report view	Easily track activity and progress by sorting on work order; due date, status and priority
Printable work orders	Print out individual work orders detailing the tasks required for completion.
Email notification	Inform select users of work order completion
Manageability	Benefits
Equipment browser	Quickly locate equipment based on vendor name, model and type, and export equipment data to excel format.
Device catalogue	Utilize the extensive library of physical infrastructure and IT devices from leading vendors
Free text search	Quickly locate devices and alerts through the free search field.
Planning	Benefits
Asset audit trail	Track asset moves, adds and changes by date/time, owner and work orders for view, print and export.
Personnel audit trail	Gain total transparency to physical equipment changes by user
Change report	Instant visibility to all moves, adds and changes to the entire data center.
Agility	Benefits
Optional deployment services	Ensure speedy deployment through the use of APC Professional Services.
Localisation	User interface available in major local languages.
User roles	Enable different levels of access through multi-user login and pre-defined user roles.
Multi-user access	Enables several users to carry out work on the application simultaneously.

## Prerequisites for running StruxureWare Operations: Change

- StruxureWare for Data Centers: Operations Suite

## StruxureWare for Data Centers: Operations Suite also encompasses the following products:

- StruxureWare Operations: Capacity
- StruxureWare Operations: Energy Efficiency
- StruxureWare Operations: Energy Cost
- StruxureWare Operations: Mobile
- StruxureWare Operations: Insight
- StruxureWare Operations: VIZOR
- StruxureWare Operations: Dashboard

For Monitoring purposes, we recommend the usage of StruxureWare Central
